The International Standard  For more than 100 years Carver hydraulic presses have been the standard for laboratories around the world. Carver Model C presses alone are in use in more laboratories than any other press. The current Carver line has been expanded and improved with more sizes, options, features, and quality performance than any other line of presses.

The Widest Choices  Standard choices now include two-column and four-column, benchtop and floor standing, and manual or automatic presses with clamping capacities from 0.5 to 100 tons. Automatic Auto Series presses include a user-friendly control system and integral safety enclosures. Accessories include self-contained, electrically operated AutoPak hydraulic power units for existing manual Carver presses.

Applications  —

Materials research: ceramics, composites, construction materials, cosmetics, drugs, pharmaceuticals, powder metals, printed circuit boards, rubber, silicone and other elastomers, soil, thermoplastic resins and thermosets

Quality and performance testing of physical properties: compression strength, flexural strength, shear strength, flow and color dispersion

Laboratory testing: ASTM test plaque or bar molds for polyethylene & polypropylene

Other applications: composite molding, compression molding, crushing, laminating, encapsulation, extrusion, forming, insert pressing, producing KBr pellets for infrared spectroscopy, metal forming (dimpling), insert molding, oil extraction, pelletizing, specimen preparation, splice molding, splitting chilled oils, transfer molding, and vulcanizing

Specialized Applications  Special presses dedicated to specific applications include ASTM test plaque or bar molding, pellet making (KBr specimens for infrared and x-ray spectroscopy) and laminating.

Custom Presses  In addition to the models shown in this catalog, Carver designs and manufactures a wide variety of custom made presses and accessories to suit your specific application. Please consult the factory for any equipment not specifically listed in this catalog.

ISO 9001:2015 Certified
How to select the right Carver press for your application:

1. Determine if you want a general laboratory press or one dedicated to a special application.
   - **General** ............... pages 4, 5, 6, 8, 9
   - **Special** ................ pages 7, 10, 11

2. Determine clamp force and choose benchtop or floor standing model.
   - **Benchtop**
     - 7.5 to 30 tons .............. pages 4, 5, 7, 8, 9, 10, 11
   - **Floor Standing**
     - 30 to 100 tons ............... page 6

3. Decide if heated platens will be needed.
   - **Heated** Floor Models .......... pages 6, 11
   - **Benchtop** ........................ pages 5, 8
   - **Unheated** Floor Models ......... page 6
   - **Benchtop** ........................ pages 5, 9

4. Refer to specification tables for appropriate work area (platen size) and daylight opening (working height between platens).

5. Refer to photos and descriptions to select two- or four-column configuration.

6. Select heat control level desired and platen options on page 12.

7. Refer to pages 12 thru 15 to select appropriate accessories for your application.

8. Note the catalog numbers of your selections on your letterhead and email to: carverpress@acscorporate.com
   
   Or, contact us for prompt assistance:
   Phone: 260-563-7577
   Fax: 260-563-7625

Automatic hydraulic laboratory presses in two- and four-post models up to 48 ton clamp capacity

Carver has incorporated over 100 years experience in laboratory presses into their automatic electrically powered benchtop presses for today’s labs. Each Auto Series Plus press has a built-in hydraulic system with a control system for accurate programmable operation. A variety of models are available ranging in clamp force capacity from 15 to 48 tons and work areas ranging from 6” x 6” to 18” x 18”. Press models include two- or four-column, pelletizing, heated, unheated and cooled configurations. All presses have integral safety enclosures with a clear front door for operator safety and observation. AutoPak power units are available for existing manual presses (see page 16).

Carver's Auto Series presses bring a world of power and control options to your lab.

Carver reserves the right to change specifications without notice. Presses and accessories may differ from photos shown.

Carver strongly recommends the use of a safety shield and personal protection equipment when operating Carver equipment.

Carver, Inc. introduces their New Auto Series Plus Automatic Hydraulic Laboratory Presses. These new presses feature a 7” color operator interface, enhanced platen temperature control with auto-tuning, ramp heating capability, and real-time trending of force and temperature. Another enhancement includes storage of up to 250 recipes with recipe preview. Optional features include data logging for cycle parameters and a seven day timer for auto platen heat-up.

Auto Series Plus press models are available with 15 to 48 tons of clamping force and 6” x 6” to 18” x 18” platens. These benchtop presses are used in quality control, research and development for test sample preparations, destructive testing, molding, laminating and fluid extraction.

- Large 7” color touch screen operator interface
- Storage of up to 250 recipes
- Enhanced platen temperature control with auto-tuning
- Ramp heating capability
- Recipe preview
- Real-time trending of force and temperature
- Seven day timer for auto platen heat-up (optional)
- Datalogging of cycle parameters (optional)
- Access to logged data through Wi-Fi (optional)
- 48 ton models include an integral wrap-around floor stand

Carver's Monarch laboratory presses with integral hydraulic system and high technology options are based on standard production press models adapted to precision laboratory requirements. Recommended for testing or research, compacting, molding rubber or plastic, laminating and assembly where stripping force is required.

Standard features include double-acting JIC style cylinder for power open and power close. An integral hydraulic reservoir is easily accessible for cleaning and includes a strainer or cartridge filter, air filter/breather, oil level indicator and oil cooler. A programmable controller with access module is standard. Optional equipment includes electrically heated platens to 500°, 650°, 800° or 1200°F, with digital temperature controllers, low pressure system, pressing speed control and automatic platen cooling.

Molding ASTM Test Specimens

Plastics, elastomers and other materials

Carver has developed three presses which are specially configured to perform the compression molding of test plaque or bar specimens of Type I, II, III or IV polyethylene and other thermoplastic resins. The procedure is in conformance with ASTM Method D 4703, Procedure C. The presses are equipped with heating/cooling platens and a programmable digital controller which has a heating/cooling loop for each platen and built-in program for the required 15°/minute ±2°C cooling rate.

CMG 30H-12 ASTM Model B, 30 tons
Floor standing, four-column, automatic press with heating/cooling platens and programmable controller.

No. 4391-ASTM Model 12-12H-ASTM, 12 tons
Benchtop, four-column manual press with heating/cooling platens and programmable controller.

Optional Portable Chillers available upon request

Proppant Crush Test Press

Models CMG28-12-PCR & CMG40-12-PCR
Compatible with ISO 13503-2:2006

For use with frac sand, resin coated sand and ceramic proppant

Carver Inc. is proud to introduce Models CMG28-12-PCR & CMG40-12-PCR Proppant Crush Test Presses. These Monarch Series presses meet the critical demands of ISO 13503-2:2006 with unsurpassed cycle repeatability. The proportional hydraulic system is capable of applying a constant rate of 13.8 MPa/min. (2000 PSI min.) from 2 ton to 28 ton clamp force within a ±2.5% deviation. The operator interface allows easy setup of press control parameters and includes ample recipe storage.

No. 5456 Proppant Crush Test Cylinder
Based on ISO 13503-2:2006(E) Crush Cell
Cell: 2” ID x 3.38” tall including removable base, wall thickness is >0.5”
Piston: 3.5” tall
All parts constructed of D2 Tool Steel, hardened to 52-56 Rockwell C

Standard Unheated Manual Presses
12, 25 and 30 ton capacity

For pelletizing, destructive testing, fluid extraction, pressure forming, etc.

12 TON PRESSES

No. 3850 (Mini C)
- Twelve ton, manual, two-column hydraulic press with 6" x 6" work area
- Compact and portable, requiring less bench space than our Model C
- This press is ideal for confined bench space or glove box applications, as well as field work
- It features adjustable daylight, steel construction for rigid precision and includes safety shield for operator protection
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

No. 3851 (Model C)
- Twelve ton, manual, two-column hydraulic lab press
- Similar to Mini C above, but larger, heavier construction with daylight to 18"
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

No. 3850
- Pellet press with 4" round platen
- Available with and without pellet die (see page 10)

No. 3968 (Model 12-10)
- Twelve ton, manual, two-column hydraulic press, with 10" x 7" work area
- Similar to No. 3851 press described above, but heavier construction with fully guided moving platen and daylight to 14"
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

No. 3969 (Model 12-12)
- Twelve ton, manual, four-column hydraulic press
- Fully guided moving platen assures parallelism over 12" x 12" surface
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

25 TON PRESSES

No. 3853 (Model M)
- Twenty-five ton, manual, two-column hydraulic press, with a 9" x 9" work area
- Daylight opening is adjustable
- Rigid cast iron and steel construction for precision and durability
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

No. 3855 (Model 25-12)
- Twenty-five ton, manual, four-column hydraulic press with a 12" x 12" work area
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

30 TON PRESSES

No. 3970 (Model 30-12)
- Thirty ton, manual, four-column, hydraulic press with a 12" x 12" work area
- Has two-speed pump, first stage for rapid closing and second for pressing mode
- Easy-to-read dual scale gauge, reading in pounds force and metric tons

Note: Existing Carver presses can be automated with an optional AutoPak power package (see back cover).

NOTE: Standard manual presses come with analog gauge (as shown in pictures). Digital gauges available upon request. Consult factory for details. Information on digital gauges may also be found on page 13.

Carver reserves the right to change specifications without notice. Presses and accessories may differ from photos shown.

Carver strongly recommends the use of a safety shield and personal protection equipment when operating Carver equipment.

**Manual Pellet Presses (4350, 4555 & 4565)**
The compact 12, 40 or 50 ton Pellet Press with 4" diameter platen is perfectly suited for KBr pellet pressing. It can also be used for Glove Box applications, compound and formula testing, compression strength tests, fluid extractions and on-site field testing. Includes integral Safety Shield, buffer plate and 1.3mm evacuable die. (not shown in picture)

Note: Pellet Models with an “L” means less die. Additional Pellet Die sizes available below and on page 13 and 15 (sold separately).

**AutoPellet Presses (3887 & 4387)**
The self-contained 25 & 40 ton AutoPellet press has 5" diameter platen and integral safety shield cabinet enclosing electrically powered hydraulic system. Rigid slab side construction maintains precise alignment and includes provision for a vacuum line connection to the pellet die. The touch screen control interface allows for programmable force and programmable decompression rate.

**Evacuable Pellet Dies**
Used with Pellet Presses to form the pellets for use in IR and x-ray spectroscopy. Complete with plunger, cylinder base plug, ejector and (2) polished anvils, along with a fitting for vacuum source connection when applicable. Constructed of 440 stainless steel. Available in sample diameter sizes 6, 12, 13, 25, 31 & 40mm. Not recommended for use in heated presses. (See pages 13 & 15 for additional details)

**No. 5021 KBr Buffer Plate Kit Assembly**
Includes: (1) KBr Buffer Plate (90mm diameter), mounts to the Top Bolster and (1) 9" x 9" hardened steel plate with centering grooves, mounts to the Moving Bolster on top of ram. For use with pellet dies and test cylinder outfits. (Picture shows 5021 plate kit installed in 3851 press)

**No. 5022 KBr Buffer Plate Kit Assembly**
Includes: (1) KBr Buffer Plate (90mm diameter), mounts to the Top Bolster and (1) 9" x 9" hardened steel plate with centering grooves, mounts to the Moving Bolster on top of ram. For use with pellet dies and test cylinder outfits.

**No. 3874 Vacuum Pump Kit**
Used with pellet press to evacuate dies. (Available in 115 or 230V)

**No. 2090-0, 1.125” ID x 3” High, 440 Stainless Steel Test Cylinder Outfit (TCO)**
For use with standard unheated presses (excluding 4350 Series) for molding, forming bricks, briquettes, pressure forming, crushing, pressing plant and animal tissues, fluid extraction, extrusion and flow tests. Not recommended for use in heated presses. (See pages 13 & 15 for additional details)

**No. 2091-5, 2.25” ID x 3” High, 440 Stainless Steel Test Cylinder Outfit (TCO)**
For use with standard unheated presses (excluding 4350 Series) for molding, forming bricks, briquettes, pressure forming, crushing, pressing plant and animal tissues, fluid extraction, extrusion and flow tests. Not recommended for use in heated presses. (See pages 13 & 15 for additional details)

**No. 2090-1 Filter pads for 1.125” Test Cylinder Outfit. (set of 12)**

**No. 2091-1 Filter pads for 2.25” Test Cylinder Outfit. (set of 12)**

**No. 237005 Stainless Steel Pan**
Used for fluid extraction when using the Test Cylinder Outfits and filter pads to make a sandwich sample. The stainless steel pan captures the released fluid.

Carver reserves the right to change specifications without notice. Presses and accessories may differ from photos shown.

Carver strongly recommends the use of a safety shield and personal protection equipment when operating Carver equipment.

PNP Series Pneumatic Presses & Laminating Presses

PNP Series Pneumatic Presses
Carver’s PNP Series Pneumatic compression molding presses for lab and production are available in 0.5-, 2- and 5-ton capacities. Please consult factory for details and available options.

Laminating Presses
Manually operated hydraulic laminating presses with stacked heating and cooling platens in bench top model. Thermostatic control, aluminum platens, heating one opening while simultaneously cooling the other results in faster production of laminated samples, plastic plaques and other R&D items. Temperature control 150-500°F (Shown with analog gauge)

- **No. 4130 (formerly 2112) Laminating Press, 12 ton capacity with Safety Shield** Four 6” x 6” aluminum platens for one hot and one cold daylight opening. Thermostat control of heated platens in top opening as shown in picture to the left.
- **No. 4132 (formerly 2630) Laminating Press, 30 ton capacity with Safety Shield** Four 12” x 12” aluminum platens for one hot and one cold daylight opening. Digital control of heated platens in top opening.

Carver Heat Control Options

There are several levels of control for heating and cooling to give you a choice to meet the specific demands of your application.

**Manual thermostat control** Basic heated platens are controlled by an integral sensor and individual manual thermostats.

**Digital control** For more precise control, individual digital temperature controllers automatically control platen temperature from a separate control panel.

- **No. 3984**
  Digital control assembly for existing hotplates.

**Manual cooling** Manual water cooling permits hand operated cooling of platens with monitoring by analog thermometers for thermostatically controlled platens and digitally on the digital platen packages.

*Note: All heaters are single phase unless otherwise noted.*

### Optional Heat Tube Platens Available

*For both Carver Benchtop and Floor Standing Presses*

**Accu-Heat™ Heat Tube Platens**

For heat uniformity

- Accuracy and uniformity up to ±1°F approx.
- Standard sizes include; 6” x 6”, 9” x 9”, 12” x 12”, 15” x 15”, 18” x 18” and 24” x 24”
- Custom engineered sizes quoted upon request
- 500°F maximum temperature
- Heated/cooled configuration also available
- Can be designed to fit existing Carver or other brand presses
- Contact factory for details and/or to request a quotation

</tr>
</tbody>
</table>

---

### No. 2092 Swivel Bearing Plates

Carver presses are frequently used for crushing and breaking tests of standard 2” x 2” cubes and 2” x 4” cylinders of concrete samples or similar crushing tests. Swivel Bearing Plates adjust slightly to the sample to assure proper application of pressure. **Requires safety shield.**

### No. 818744C Punch and Die Holder

This punch and die holder permits off-line testing of pellet and tablet samples. It works with standard BB2 production tooling in most Carver presses, including Auto Series presses. The set includes an anodized aluminum holding fixture, steel shims to adjust for various size samples, and an anodized aluminum ejector. (does not include dies)

### No. 2096CE & 2096-1CE Two Gauge Manifolds

The 2096CE is for most standard manual presses, except the Mini C. The 2096-1CE is specifically designed for the Mini C Model Press only. These manifolds permit mounting of both high (right) and low (left) range gauges for more precise application of force. Hand operated shut-off valve protects low pressure gauge when using high pressure. **Analog Gauges sold separately.** (see page 15)

### No. 6306 Digital Gauge

Optional digital force gauges for manual presses. Available in 10 or 100 pound increments. They are scaled per press model. Approximate accuracy: ±1% of reading between 1,000 lbs up to maximum tonnage of press (12, 25 or 30 tons). Consult factory for press details.

MOLDS AND DIES
(See page 10 & 13)

Test Cylinders & Pellet Dies

2090-0
Test cylinder outfit, 1.125” ID

2090-1
Set of 12 filter pads for 1.125” ID TCO G

2091-5
Test cylinder outfit 2.25” ID

2091-1
Set of 12 filter pads for 2.25” ID TCO G

237005
Stainless steel pan for either TCO size

4417
6mm pellet die, 440 stainless steel

4946
12mm pellet die, 440 stainless steel

3619
13mm pellet die, 440 stainless steel

4369
25mm pellet die, 440 stainless steel

3902
31mm pellet die, 440 stainless steel

3876
40mm pellet die, 440 stainless steel

5456
2” ID Propan Test Cylinder based on ISO 13503-2:2008(E) Page 7 & 13

2092
Swivel bearing plate (Requires safety shield)

2095
KBr buffer plate

818744C
Pharmaceutical pellet die holder

ASTM Molds
(See pages 7 and 13)

4079
4” x 4” chase assembly, Teflon

4080
4” x 4” chase assembly, Stainless steel

4081
4” x 4” chase assembly, Brass

4082
6” x 6” chase assembly, Teflon

4083
6” x 6” chase assembly, Stainless steel

4084
6” x 6” chase assembly, Brass

4085
8” x 8” chase assembly, Teflon

4086
8” x 8” chase assembly, Stainless steel

4087
8” x 8” chase assembly, Brass

4161
(100) 6” x 6” mylar sheets for 4” x 4” molds

4162
(100) 8” x 8” mylar sheets for 6” x 6” molds

4163
(100) 10” x 10” mylar sheets for 8” x 8” molds

Tile Molds and Color Dispersion
(See page 13)

818698D
4” x 4” tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818699D
6” x 6” tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818700D
10” x 10” tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818701D
50mm x 50mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818702D
100mm x 100mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818703D
150mm x 150mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel

818704C
50mm diameter color dispersion disc, 0.1mm, 0.2mm & 0.5mm thick, Stainless steel

818705D
100mm diameter color dispersion disc, 0.1mm, 0.2mm & 0.5mm thick, Stainless steel

TESTING/PROCESSING
Polished Plates
(For laminating applications)

235020
SS Plate with #8 mirror finish, polished on 1 side, 6” x 6” x 0.03” thick

235021
SS Plate with #8 mirror finish, polished on 1 side, 9” x 9” x 0.03” thick

235022
SS Plate with #8 mirror finish, polished on 1 side, 9” x 12” x 0.03” thick

235023
SS Plate with #8 mirror finish, polished on 1 side, 12” x 12” x 0.03” thick

Heated Test Cylinders

2472
1.125” heated test cylinder

2417
2.25” heated test cylinder

SAFETY SHIELDS
(See page 14)

3404
For most Mini C presses

3295
For most Model C presses

3253
For most Model M presses

3322
For most presses with 10” x 7” platens

3418
For most presses with 12” x 12” platens

4427
For 3690 and 3693 with 15” x 15” platens

ANALOG GAUGES
(See page 13 for digital gauge options)

Gauges for Model B/C

381005
Gauge normally furnished with Model C press, 0 - 24,000 lbs applied force, 11 metric tons, 200 lb increments

381042
Model B/C gauge, 0 - 500 lbs, 0.225 metric tons, 5 lbs increments

381001
Model B/C gauge, 0 - 1,000 lbs, 0.45 metric tons, 10 lb increments

381002
Model B/C gauge, 0 - 2,000 lbs, 0.9 metric tons, 20 lb increments

381003
Model B/C gauge, 0 - 5,000 lbs, 2.25 metric tons, 50 lb increments

381004
Model B/C gauge, 0 - 10,000 lbs, 4.5 metric tons, 100 lb increments

Gauges for Model K/M

381008
Gauge normally furnished with Model M press, 0 - 50,000 lbs applied force, 22.5 metric tons, 500 lb increments

381006
Model K/M Gauge, 0 - 5,000 lbs, 2.25 metric tons, 50 lb increments

381007
Model K/M Gauge, 0 - 10,000 lbs, 4.5 metric tons, 100 lb increments

381176A
Model K/M Gauge, 0 - 1,000 lbs, 0.46 metric tons, 10 lb increments

Two Gauge Manifold
(See page 15)

2096 $€
Two gauge manifold

2096 $€-C
(mini C only)

Dial Thermometers

385001
Dial face thermometer 150°F to 750°F

385019
Dial face thermometer 50°C to 400°C

HYDRAULIC UNITS
(Specify press Serial Number)

3912
12 ton hydraulic unit

3925
25 ton hydraulic unit

321007
Pump and reservoir for 30 ton presses

3467-0
Hydraulic cylinder for 30 ton presses

3720
12 ton repair kit (gray only)

3730
25 ton repair kit (gray only)

2170
Carver hydraulic fluid (pint size)

AUTOPAK® POWER UNITS
(See page 16)

3946NE
AutoPak/12, for 12 ton existing manual presses.

3947NE
AutoPak/25, for 25 ton existing manual presses.

3948NE
AutoPak/30, for 30 ton existing manual presses.

FLOOR STANDS
(See page 14)

223160C
Press stand for 3690 & 3693 presses

223171D
Press stand for 2 column and 4 column presses

223215C
Press stand for 2 column and 4 column presses with casters

223321D
Press stand for standard PL Auto Series presses (excluding 48 ton models)

223319C
Press stand for standard PL Auto Series presses with casters (excluding 48 ton models)

Add Power to Existing Presses

**AutoPak™ Power Units**

- Self-contained 1/4 HP hydraulic power unit
- Develops maximum clamping force for most of our 12, 25 and 30 ton manual press models (minimum 1,000 lbs)
- Six feet of hose for connecting to existing Carver hand operated press
- Programmable control system (force only)
  - Touch screen interface
  - 10 recipe storage capability
  - 20 programmable segments of clamp force and dwell time per recipe
  - Programmable in units of pounds (also available in Kg, US tons, and metric tons)
  - Automatic bump sequence (can be programmed in any or all segments)
  - Two-hand anti-tie-down close buttons for operator safety
- Interlocked switch for existing safety shield door included (See page 14 for recommended safety shield)
- 115V 1-Ph or 230V 1-Ph supply voltage (please specify)
- Electrical disconnect (non-fused)
- Approximate dimensions & weight: 24” L x 20” W x 21” H, 130 lbs

**Custom Presses**

Customized presses can be configured from the many options and accessories listed in this catalog. In addition, Carver engineers will work with you to design special presses for your particular application. Consult the factory for more information. Press shown is a custom designed Auto Series four column press with casters and built in floor stand.

**Carver Warranty**

Carver Inc. warrants all equipment we manufacture to be free from defects in workmanship and material when used under recommended conditions. The company's obligation under this warranty is limited to those parts which within twelve (12) months from delivery of equipment to original purchaser are returned to the factory with transportation prepaid, and upon examination shall disclose them to be defective. Carver neither assumes, nor authorizes any other persons to assume any liability in connection with the sale of its equipment except under the conditions of this warranty.

This warranty does not cover any labor charges for replacement of parts, adjustment, repair or any other work done. This warranty shall not apply to any apparatus which in our opinion has been subjected to misuse, negligence or pressures in excess of limits recommended, or which shall have been repaired or altered outside of the Carver factory.

Replacement of defective material(s) will be FOB the Carver factory. Replacement of component parts not of its manufacture will be limited to the warranty of the manufacturers of such parts.

Warranty claims: Please contact our Service Department at 260-563-7577 ext 5238 or service@acscorporate.com

**Rely on Carver and WABASH Presses for Every Need**

Carver, Inc. and WABASH MPI are sister companies located in Wabash, Indiana. For over 75 years WABASH MPI has met the challenge of designing and manufacturing standard and special presses for industry worldwide. Parts, service and support information are readily available. Ask to see installations of Carver or Wabash presses performing productively in your area. Consult with us to discuss all of your molding requirements.

WABASH manufactures 15 to 1,000 ton molding machines for elastomers and thermoplastics, Compression molding machines, C-Frame presses, Vacuum chamber molding and laminating presses and Trim presses. For more information on any of our presses call 260-563-1184, fax 260-563-1396, email: wabashleads@acscorporate.com, or visit our website at www.wabashmpi.com.
