Individuals with pre-existing respiratory tract (nose, throat, and lungs), eye, and/or skin disorders may have increased susceptibility to the effects of exposure.

CHRONIC:
Prolonged or repeated inhalation of oil mist may cause oil pneumonia, lung tissue inflammation, and/or fibrous tissue formation. Prolonged or repeated eye contact may cause inflammation of the membrane lining the eyelids and covering the eyeball (conjunctivitis). Prolonged or repeated skin contact may cause drying, cracking, redness, itching, and/or swelling (dermatitis).

CANCER INFORMATION:
No known carcinogenicity. For more information, see SECTION 11: CARCINOGENICITY.

SECTION 4: FIRST AID MEASURES

INHALATION (BREATHING):
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention, if needed.

EYES:
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if needed.

SKIN:
IF ON SKIN: Wash with plenty of soap and water. Get medical attention if needed.

INGESTION (SWALLOWING):
IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

NOTE TO PHYSICIANS:
Treat symptomatically and supportively. Treatment may vary with condition of victim and specifics of incident. Call 1-800-468-1760 for additional information.
HAZARDOUS COMBUSTION PRODUCTS:
Decomposition and combustion materials may be toxic. Burning may produce sulfur oxides, aldehydes, ketones, carbon monoxide, and unidentified compounds.

CONDITIONS OF FLAMMABILITY:
Negligible fire hazard. Avoid friction, static electricity and sparks.

PROTECTIVE EQUIPMENT FOR FIREFIGHTERS:
A positive-pressure, self contained breathing apparatus (SCBA) and full-body protective equipment are required for fire emergencies.

EXTINGUISHING MEDIA:
Carbon dioxide, regular foam, dry chemical, water spray, or water fog. Water or foam may cause frothing. Do not use high-pressure water streams.

NFPA 704 HAZARD IDENTIFICATION:
This information is intended solely for the use by individuals trained in this system.

FIRE FIGHTING INSTRUCTIONS:
Move container from fire area if it can be done without risk. Keep storage containers cool with water spray. Heated containers may rupture or be thrown into the air. “Empty” containers may retain residue and can be dangerous. Product is not sensitive to mechanical impact.
SECTION 6: ACCIDENTAL RELEASE MEASURES

Remove all ignition sources. Do not touch or walk through spilled product. Stop leak if you can do it without risk. Wear protective equipment and provide engineering controls as specified in SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Ventilate area and avoid breathing vapor or mist. Contain spill away from surface water and sewers. Contain spill as a liquid for possible recovery, or sorb with compatible sorbent material and shovel with a clean, spark proof tool into a sealable container for disposal.

Additionally, for large spills: Dike far ahead of liquid spill for collection and later disposal.

SECTION 7: HANDLING AND STORAGE

HANDLING: Keep away from sparks or flame. Where flammable mixtures may be present, equipment safe for such locations should be used. Use clean tools. When transferring large volumes of product, metal containers, including trucks and tank cars, should be grounded and bonded. These products have a low vapor pressure and are not expected to present an inhalation hazard under normal temperatures and pressures. However, when aerosolizing, misting, or heating these products, do not breathe vapor or mist. Use in a well ventilated area. Avoid contact with eyes, skin, clothing, and shoes.

SHIPPING AND STORING: Keep container tightly closed when not in use and during transport. Store containers in a cool, dry place. Do not pressurize, cut, weld, braze, solder, drill, or grind containers. Keep containers away from flame, sparks, static electricity, or other sources of ignition. Empty product containers may retain product residue and can be dangerous.

INCOMPATIBILITIES: Strong oxidizing materials.
## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**COMPONENT EXPOSURE LIMITS:**

ACGIH, OSHA, and NIOSH have not developed exposure limits for any of this product's components.

**APPROPRIATE ENGINEERING CONTROLS:**

Where adequate general ventilation is unavailable, use process enclosures, local exhaust ventilation, or other engineering controls.

**INDIVIDUAL PROTECTIVE MEASURES (PPE):**

Personal protective equipment should be selected based upon the conditions under which this material is used. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to regulatory requirements. The following PPE should be considered the minimum required Safety glasses, lab coat or apron.

**EYES/FACE PROTECTION:**

Safety glasses with side shields should be worn at a minimum. Additional protection like goggles, face shields, or respirators may be needed dependent upon anticipated use and concentrations of mists or vapors. Provide an emergency eye wash fountain and quick drench shower in the immediate work area. Contact lens use is not recommended.

**SKIN PROTECTION:**

Where skin contact is likely, wear neoprene, nitrile, or equivalent protective gloves; use of natural rubber or equivalent gloves is not recommended.

**RESPIRATORY PROTECTION:**

No respiratory protection is normally required. Use NIOSH-certified P- or R-series particulate filter and organic vapor cartridges when concentration of vapor or mist exceeds applicable exposure limits. Protection provided by air purifying respirators is limited. Do not use N-rated respirators. Selection and use of respiratory protective equipment should be in accordance in the USA with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Consult with a health and safety professional for specific respirators appropriate for your use.
